

Lorenzo Marcon

Front end / Full stack web developer

Passionate about excellence, obsessed with details, versatile by nature

Summary

I spent my university years integrating what I studied with self-acquired skills; for my master thesis I worked on complex data analysis on web search engine query logs; a scientific article on this work has been published in 2012.

- **Excellence:** co-founded sport social network which received two rounds of investments and partnered with largest publisher in Italy (RCS);
- **Details:** as a project manager, I am used to delivering instructions clearly to both internal & external teammates;
- **Versatile:** experience with heavy lifting on UX, front end, back end and even hardware.
